

## smart with CLEVER-END

The new dimension as regards loading space extension

### The smart

Whether diesel or petrol-driven car, the smart is a very economical vehicle and because of its size most appropriate to cities and urban agglomerations. It goes in nearly every parking space and it drives very quickly in the heavy city traffic. A likeable, attractive and urban car – the perfect basis for our product CLEVER-END.

### CLEVER-END

The loading space extension CLEVER-END increases the loading volume of the smart by almost 100% without any effect on the vehicle payload allowed. This offers the optimum condition for those who want to transport more than the usual stuff. For both tradesmen like craftsmen, service mechanics, delivery services, courier services etc. and individuals the smart with CLEVER-END will be the perfect solution as regards loading space extension. The smart with CLEVER-END offers megaspace in a minimum room.

Not only for the big dog, baby carriage or two big suitcases, there will also be enough room now for bulk buying. And what is really fantastic, the big tailgate of the CLEVER-END opens very wide and allows easy loading and unloading.

The CLEVER-END loading space extension is available with and without rear window and in any painting according to the customer requirement.

### Fitting / licence

The loading space extension CLEVER-END will be fitted instead of the existing boot lid. The fitting will be effected to existing fixing points on your smart. Also untrained people will be able to fit this product. Of course the CLEVER-END is approved by the Technical Inspection Authority "TÜV" and will always be delivered with a general type approval and a detailed fitting instruction.

### Advertising medium

For tradesmen the smart with CLEVER-END will be a perfect advertising car which will leave a likeable impression everywhere.

### Accessories

The following attractive accessories are available for the smart with CLEVER-END: velours carpet, nylon shopping bag, loading space bowl, foldable plastic box with several storage cases ...

### Sales

The CLEVER-END loading space extension will be available at all SORTIMO subsidiaries and stations in Germany and other European countries as well as other sales partners. A list of all sales partners is shown under [www.clever-end.de](http://www.clever-end.de).
