

smart with TOOLBACK

The workshop car for the use in cities and urban agglomerations

The smart

Whether diesel or petrol-driven car, the smart is a very economical vehicle and because of its size most appropriate to cities and urban agglomerations. It goes in nearly every parking space and drives very quickly in the heavy city traffic. A likeable, attractive and urban car – the perfect basis for the CLEVER-PARTS TOOLBACK.

TOOLBACK

The loading space extension TOOLBACK increases the loading volume of the smart by almost 100% without any effect on the authorized weight. This offers the optimum condition für craftsmen, service mechanics, service technicians etc. who are driving in cities and urban agglomerations. The TOOLBACK is the basis for the system equipment of SORTIMO Int.

SORTIMO System Equipment

Especially for the CLEVER-PARTS TOOLBACK SORTIMO Int. developed a vehicle equipment which is available in three basic variants. The "LIGHT" – "STANDARD" and "PREMIUM" systems are designed in the way that a maximum utilisation is possible. Whether bigger or smaller tools, screws, accessories, spare parts or other things required by craftsmen shall be carried along – the TOOLBACK with the appropriate SORTIMO equipment offers magaspaces in a minimum room.

The systems will be fixed on six fixing points existing on the vehicle, i.e. directly on the car-body, and therefore a safe stability is guaranteed, also in case of extreme situations. A maximum protection of the driver and co-driver is given as the systems are all provided with stable and continuous rear panels.

User

The smart with SORTIMO TOOLBACK is exactly the right car for all craftsmen, service mechanics, service technicians, caretakers, lock and key services etc. who work in cities and urban agglomerations. It offers a lot of space in a minimum room, goes in nearly every parking space and is very favourable in maintenance.

Advertising medium

Furthermore the TOOLBACK is an attractive and likeable advertising medium which will attract attention wherever it appears.

Work + save money + find new contacts = **SORTIMO-TOOLBACK!**

Sales

The TOOLBACK and the SORTIMO vehicle equipments will be available at all SORTIMO subsidiaries and stations in Germany and other European countries as well as other sales partners. A list of all sales partners is shown under www.clever-end.de.
